**Subject:** Additional Sampling for Soil Vapor Area 40  
**Attachments:** area40soilvapor.pdf

Attached is what I drafted several weeks ago, prior to the last meeting and provided to USEPA as my initial cut at additional soil vapor sampling locations for Area 40. I have not found any additional information that would change the locations – there could be additional sample locations ones based on results from these. The southern locations are shown on one of the shallow figure (middle) and the northern on the intermediate figure (far right). Wanted to get this out to all before our meeting. I will review again after seeing what Aerojet has provided this week.
